## Datasheet

Catalog Number:	<b>422 161 160</b>
Name of Product:	PES rope with core
Description:	16-strand PES rope with core, diam. 6 mm
Material:	Polyester (PES) 100%
Technical parameters	
Linear density:	25 g/m
Diameter:	6,0 mm
Elongation at break:	18 %
Tenacity:	5500 N
Features:	Rope is produced from high-tenacity technical polyester yarn. High abrasion, chemical and UV resistance.
Use:	Water sports, yachting, for fixing water pumps
Product care:	Washing max. temperature 60 °C Chemical cleaning: usual way in textile Bleaching: not chlorin Drying: in drying machine – usual temperature 
Liquidation:	Made from an inert material. It is possible to defer to the landfill or in special mill for recycling textile.
